

HEAVY DUTY CORROSION PROTECTION

Rust impairs equipment safety, aesthetics and resale value. Our patented electromagnetic technology is an Eco-friendly and workplace-safe alternative to messy petrochemical sprays, and it protects areas that spray chemicals cannot reach.

Final Coat's electromagnetic corrosion protection technology is patented and certified by these international regulatory authorities.

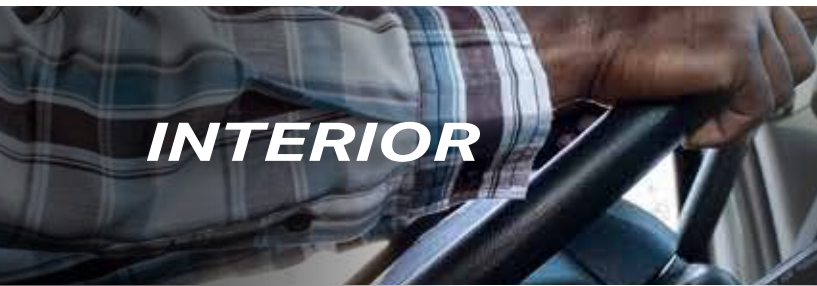

EXTERIOR

Final Coat's eco-friendly Exterior Paint Protection provides added defense on all painted surfaces. FCX provides a lasting protective barrier and creates a smooth, easy-to-clean surface that resists dirt and debris adhesion and deflects UV rays.

INTERIOR

Spills and stains are just some of the many mishaps that can quickly affect the appearance of your equipment interior. Final Coat adds an invisible barrier of protection on fabric, leather and vinyl surfaces.

WINDSHIELD +

Clarity on the job is critical. By installing Windshield +, this super hydrophobic formula will resist water and dirt build-up, providing your operators with a clear view even in the harshest weather.

PROTECTION AGAINST DAMAGE CAUSED BY:

- Salt Damage
- UV Protection
- Insect Damage
- Overspray
- Acid Rain
- Road Tar
- Industrial Fallout
- Tree Sap
- Spills & Stains
- Oxidation / Loss of Gloss
- Bird Droppings
